

XM radio is one of the best pieces of portable technology I have ever purchased. I like the fact that I pay my \$10.00 every month - I know it is an excellent value. We travel from coast to coast and from border to border. One of the features I enjoy very much is the weather and temperature displays on my little monitor. With this note, I hope it helps the nab realize that trying to stifle what i pay for is just another form of infringement that we are suseptible to. Thank you for alerting us to the issue before us. Rock on xm!
